

eWASTE DISPOSAL

The secure, easy way to dispose of your old point of sale equipment

You have replaced your old POS equipment with the latest in technology. You put a lot of work into ensuring that your stores can realize the advantages of the new technology without any down time. Now that your stores are up and running, what are you going to do with your old equipment? How should they be destroyed? Are there security or environmental requirements that need to be considered? What about PCI requirements on your payment terminals? Is there a market for the equipment?

Proper disposal of this equipment, and in particular your payment terminal devices, is just as important as their initial deployment. POSDATA provides an eWaste disposal service that is thorough, simple to use, secure and meets all regulatory requirements.

Our team will work closely with you to develop an inventory list, by model and serial number, of devices to be disposed of. We then leverage our disposal partners to find the best method of disposal for your needs. We accept terminal deliveries directly from your stores, or we will come to your locations and pick up the equipment.

POSDATA will ensure that all terminal devices on your inventory list are received. We will provide you a report of all discrepancies encountered. Each device is disassembled and critical internal components are destroyed. All applications, customer information and security keys are permanently disabled. The device components then will be properly recycled, including any hazardous materials contained in the circuitry. At the end of the process,

POSDATA takes the work out of safely discarding your POS equipment and secure payment terminals

you receive a comprehensive report that lists all items disposed of, and a Certificate of Recycling.

Enjoy the benefits of your new technology by letting POSDATA take the work out of the proper disposal of your point of sale and secure payment terminal eWaste. Contact us today for more information or a custom quote.

POSDATA's eWaste disposal service is...

Easy – We pick up your equipment or accept delivery from your stores

Environmentally Safe – Rest assured your equipment is properly recycled

Secure – We destroy all applications, customer information and security keys
