iSMP4 Companion

Meeting enterprise requirements for mobile point of sale

The need for greater mobility and flexibility in payment acceptance is driving widespread adoption of mobile point of sale (mPOS) solutions. But enterprise environments have a unique and often complex set of requirements.

At Ingenico Group, we've solved these challenges by introducing the next generation of enterprise mobility: a complete, end-to-end solution for payment acceptance.

iSMP4 Companion mPOS Device

The enterprise mPOS solution for flexibility in payment acceptance, connectivity and integration.

Accept all of the latest methods of payment and enjoy Bluetooth or WiFi connectivity plus compatibility with any iOS, Android, Windows or Linux device.

Countertop Stand

Quick and easy conversion of an iSMP4 to a stand-beside device.

Use the available countertop stand to easily convert your iSMP4 handheld from a mobile device to a fixed and stand-beside card reader whenever needed.

Universal Tablet Enclosure

Lightweight, ergonomic support and protection for an 8" tablet, plus the iSMP4.

Easily carry an iSMP4 and tablet in one hand with this compact and lightweight enclosure that supports popular 8" tablets from Apple, Samsung, HP and Dell.

Holster

Shoulder-strap or belt-clip holster with drop-in design for easy access.

Add this optional holster for easy carrying and access to the iSMP4, including shoulder strap rings and an integrated, metal belt clip.

Multi-Bay & Single-Bay Docking Stations

Power, communications and security for tablets and iSMP4 devices.

Charge and secure your iSMP4 devices and 8" tablets with a multi-bay or single-bay docking station including a locking mechanism and support for USB and Ethernet communications.

Top 3 Enterprise mPOS Objectives

Move customers out of the store faster

Deliver high-value service to high-value customers

Improve face-to-face customer engagement

User-friendly and ergonomic design

A sleek and compact device, the iSMP4 includes a 2.8" backlit color display—the largest in its class—to provide an optimal user experience, even in bright outdoor environments. An illuminated EMV slot guides consumer interactions.

The accompanying universal tablet enclosure fits a variety of popular 8" tablets without restricting users to a single device. The enclosure allows associates to carry a payment terminal and tablet in one hand, with a center gripping point and easy access to the iSMP4's barcode scanner and the tablet's camera.

Enterprise-grade performance and security

Equipped with an optional 1D/2D commercial-grade barcode scanner, featuring laser-aiming technology and low-profile launch buttons, the iSMP4 reliably scans loyalty cards, coupons, barcodes, QR codes and even driver's licenses.

Its long-lasting 2000mAh battery adds further durability with support for a full workday, and the battery can be easily swapped out for rapid replacement.

The optional multi-bay or single-bay docking station enables simultaneous data communication and charging of the iSMP4 and a tablet, including an iSMP4 battery tester and the ability to charge additional spare batteries. Or simply use the iSMP4's USB Type-C port to charge the device with the included charger and USB cable.

The docking station also provides an advanced locking system to secure all components with a tamper-resistant mounting for PCI 4.x compliance.

Wide range of connectivity and integration options

Built on the same platform as Ingenico Group's full-featured payment devices, the iSMP4 provides a single integration across all your payment initiatives.

Pair it with virtually any smartphone or tablet to convert it into a mobile point of sale, and connect it via Bluetooth, Wi-Fi, and physical pairing to enable integrated and semi-integrated options.

The iSMP4's modular design and 10-pin connector also deliver robust physical connectivity for power and data communication, enabling integration with third-party mobile devices, cases, stands and docks.

86%

of merchants have begun or plan to implement an mPOS strategy.

Comprehensive range of use cases

The iSMP4 supports a wide range of enterprise use cases and can be used as a companion, integrated or stand-beside device.

This complete, end-to-end mPOS solution offers flexibility and support for the most demanding enterprise environments across a broad range of industries, including:

FIELD SERVICES

FOOD & BEVERAGE

HOTEL & LODGING

RETAIL

EVENT / VENUES

HEALTHCARE

TRANSPORTATION

According to Gartner research, increasing customer engagement and improving mobile store/enterprise capabilities made the list for **Top 10 Major Strategies over the Next 18 Months**, and mobile POS made the list for **Top 10 Technologies for 2017**.
