shiptrack™

WHAT IS **SHIPTRACK?**

ShipTrack is the world's most innovative and scalable logistics management platform.

Our motto effectively describes what we do:

Track Anything, Anywhere.

This cloud-based service is easily configurable to fit your workflow and offers an intuitive, ergonomic interface that your workforce will adopt quickly.

WHY USE **SHIPTRACK?**

Go Paperless
Upgrade to a real-time, digital workflow while eliminating the costs associated with paper-based processes.

Increase Productivity
Leverage automated processes for more effective dispatch, order processing, and driver management.

Improve Customer Service
Provide both your customers and CSRs with real-time access to shipment information, reducing call-centre volume and enabling first-call resolution.

Deliver Faster
Manage ETA's, optimize routes, and provide delivery SLA's with 360 degree visibility for logistics operations, shippers, and consignees.
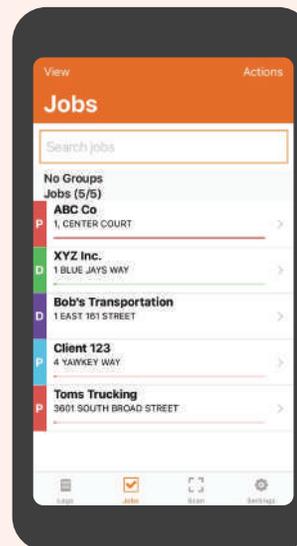

Invoice Faster
Eliminate paper and build digital workflows that initiate invoicing automatically and in real-time.

Enhance Driver Safety
Monitor compliance and ensure driver safety with safety checklists and turn-by-turn directions

What it does:

Shiptrack's mobile application is available for both iOS and Android devices. The application electronically receives driver manifests and allows the driver to update shipment information in real time. ShipTrack will also leverage the device's peripherals in order to capture signatures, GPS coordinates, photos, and much more.

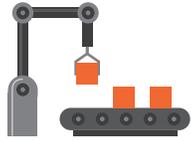

WHO USES **SHIPTRACK?**

COURIER

DISTRIBUTION

RETAIL

LTL/LINE HAUL
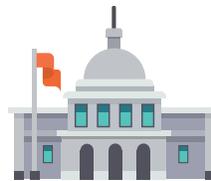

MANUFACTURING

PRIVATE FLEET

SHARED / CORPORATE SERVICES

HEALTHCARE

GOVERNMENT

ShipTrack is used by a range of customers in several industries:

Transportation firms use ShipTrack to manage their pickup and delivery operations whether they own the vehicles or not.
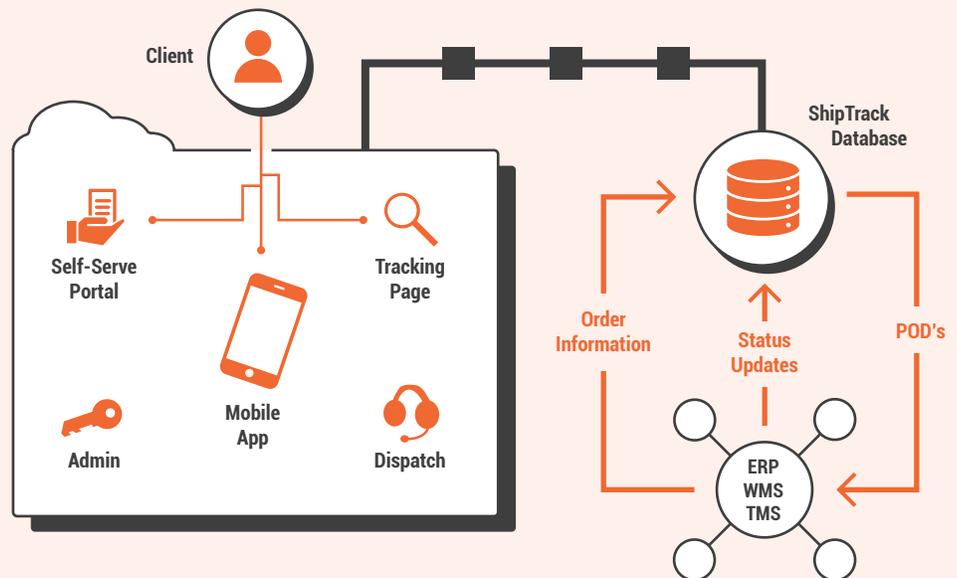

Manufacturers, distributors, and retailers use ShipTrack to manage their deliveries down to the last mile.

Government and Corporate mailrooms use ShipTrack to manage the receipt and distribution of mail and parcels.

How It Works:

ShipTrack includes a wide variety of tools to help you manage and track your P&D operations. These tools allow our customers to do everything from order management, dispatch, route optimization, and proof of delivery—all in a paperless environment.
