

Labeling Solutions for Medical Device Product Identification

Ensure UDI compliance with durable labels that stay affixed

When it comes to labeling medical devices, Zebra understands that cleaning agents can be your toughest challenge. Hospitals are required to disinfect and sterilize medical devices, but the chemicals in cleaning agents can degrade label adhesiveness and readability.

Zebra Certified Supplies offers reliable labeling solutions to help ensure your medical device labels resist cleaning agents, stay affixed and identifiable, and comply with Unique Device Identification System (UDI) regulations. Zebra solutions enable traceability, minimize non-compliance, maximize printer uptime and set up your operations to move full speed ahead without FDA citations, stop-shipments, re-labeling or fines.

Reliable Scannability: We never substitute materials. Our manufacturing plants are ISO 9001 certified with standard documented processes in place. We deliver consistently high-quality print and adhesive performance every time you order.

Durable Under Challenging Conditions: Our offerings include pre-tested labeling solutions that resist hospital cleaning agents, Steam Autoclave, Gamma Radiation and Ethylene Oxide sterilization.

UL Certified Solutions: We provide one of the largest selections of UL certified label and ribbon combinations, including UL 60601 and IEC 60601-1 labeling solutions.

Zebra Printers + Zebra Certified Supplies: Our supplies go through a 23-point test process. When you use printers and media designed together to work together, despite tough conditions, productivity soars.

Direct Product Identification Labels

Material Name	Material Type	Key Features	Chemical Resistance	Ribbon
PolyPro 4000T	Matte Kimdura polypropylene label	Excellent Print Quality and Durability at a Economical price; Withstands ETO & Gamma Sterilization	Isopropyl alcohol, bleach and additional healthcare cleaning agents	5586
Z-Ultimate 2000T	Gloss polyester label. Available in white	UL approved; Scratch Resistant; Withstands Steam Autoclave, Gamma Radiation, Ethylene Oxide Sterilization	Isopropyl alcohol, bleach and additional healthcare cleaning agents	6200/5100
Z-Ultimate 4000T	Gloss polyester label	UL 969 & UL/IEC 60601-1 for electronic medical devices; Withstands Steam Autoclave, Gamma Radiation, Ethylene Oxide Sterilization	Isopropyl alcohol, bleach and additional healthcare cleaning agents	5100
Z-Xtreme™ 4000T	Matte polyester label	UL 969 for electronic medical devices; Withstands Steam Autoclave, Gamma Radiation, Ethylene Oxide Sterilization	Isopropyl alcohol, bleach and additional healthcare cleaning agents	5095

Product Packaging & Carton Identification Labels

Material Name	Material Type	Key Features	Ribbon
Z-Select 4000T	Thermal Transfer Paper Label	Temperature exposure up to 200°F; Withstands Gamma Radiation and Ethylene Oxide sterilization	1600
